SUMMARY OF GOVERNOR HODGES' BIENNIAL MESSAGE

Delivered to joint session of the General Assembly
of North Carolina at 12:00 noon, February 5, 1959

Governor Hodges noted that this was the third and last regular session of the General Assembly to which he had presented a biennial message. He stated that he would present his budget message dealing with revenues and appropriations on Monday, February 9.

The Governor stated that the challenge of the future is how to provide North Carolina with better public schools and colleges, more adequate health and welfare services, more roads and highways, a diversified agriculture and industry, a greatly improved system of courts, continued improvement in the organization and operation of State Government and improved tax laws.

The State's Economy -- Agriculture and Industry

Diversification and development in agriculture and industry have been among the major objectives of this Administration. Tax changes made by the 1957 General Assembly have enabled the State to attract industry on the basis of a fair tax structure. Temporary loss in corporate tax revenues has been less than one-half of the $14 million which was estimated in 1957. In 1957 new and expanded industrial and agricultural processing plants in the State were valued at $191 million, a new high; in 1958 this figure amounted to $253 million. New plants and expansions alone in 1958 are expected to employ 21,750 persons, with an annual payroll of over $72 million.

This plant increase of 32.5% compares with a national decrease of 17.4%; thus North Carolina is 50% better than the national average in plant growth. Tax changes are only one factor in this growth; citizens, the Legislature and State officials and employees have all made theircontributions.

Tobacco farm income in 1957 decreased by $137,313,000, or 27.1% over the previous year, causing the State to drop from 44th to 45th in per capita income in the United States. Estimated farm income for 1958, however, is up at least 8% over 1957.

Conservation and Development of our Resources

Our forest conservation program is progressing well. In 1958, 84 million seedlings were distributed to landowners; this is about five times as many as were distributed in 1954.

A new geological map of the State was issued in 1958, the first such complete map since 1875.

Water conservation is an increasingly important program. I endorse the recommendations of the Reorganization Commission which would create a Department of Water Resources to handle this program, and would continue the State Stream Sanitation Committee until July 1, 1965, to complete the classification of streams.

A sensible program must be begun and continued, with the aid of Federal agencies, to stabilize inlets and dunes and restore the Outer Banks. Specific recommendations as to this program will be included in the budget message.

Public Education and School Finance

For the current biennium, 76% of total General Fund appropriations is for education, with 67% being for public schools alone. The Committee for the Study of Public School Finance, authorized by the 1957 General Assembly, has recommended an incentive plan to encourage local supplementary support for the schools. This

proposal is consistent with the present approach to public school finance -- basic State support with local supplement -- and is sound. I urge the General Assembly to enact suitable legislation to effectuate the proposal of the School Finance Study Committee.

Higher Education

By 1969 the enrollment in State-supported institutions of higher learning will be nearly double that for 1958. Despite this rapid increase North Carolina ranks low in the ratio of college enrollment. I should like to see college pre-admission tests used by every State-supported institution of higher learning by 1961 -- not as a rigid criterion of admission, but as a useful tool.

The reasonable requirements for capital improvements in these institutions of higher learning will be substantially less during the next decade than the $105 million spent for this purpose in the last decade.

Notable advances in community colleges have been made in the last two years. Present accomplishments in the field of higher education are good and potentials are unlimited. Differences between the Board of Higher Education and University Trustees have been resolved and the changes in present statutes supported by the Board of Higher Education and governing boards of the various institutions are endorsed by me.

Welfare and Health

Government has an obligation to assist those who cannot assist themselves. I urge the Legislature to consider carefully proposals to be presented dealing with strengthening our support laws and making possible better control over welfare payments, especially those involving illegitimate children.

More than 3½ million doses of Salk polio vaccine have been administered to over a million children in North Carolina in the last two years. It is estimated, however, that 20% of our children through age 19 have never received any polio vaccination. The General Assembly should consider a law requiring polio vaccination, especially for younger children.

Employment Security

North Carolina has for many years maintained a soundly-operated employment security program. Our weekly benefits are about equal to the national average. In 1958, a year of abnormally high unemployment, more than 200,000 workers in North Carolina received benefits. I do not think that proposals to administer the employment security program from Washington are sound. The States should take the lead in this matter and do whatever is necessary to cope adequately with periods of prolonged unemployment. I recommend that the General Assembly enact laws authorizing the Governor, under emergency conditions specified by law, to extend the benefit period for an additional 13 weeks, thus permitting payment of unemployment benefits for as much as 39 weeks at a time, when those benefits are most needed.

Minimum Wage

I strongly recommend the enactment of a State minimum wage of at least 75¢ per hour. Employers can afford it, employees deserve it, and the State's economic progress demands it.

State Personnel

The budget message will contain recommendations regarding several phases of employee relations.

National Guard

The North Carolina National Guard, recently re-organized under modern military concepts, will be maintained at practically the same strength as before.

Highways

The State Highway Commission, reorganized under authority granted by the 1957 General Assembly has achieved outstanding results. Complete secondary roads plans for the present biennium have been approved by all counties and the Commission. Contrary to the assertions of some people, the Highway Commission is now more responsive to all the people, and roads are being built where most needed. Between July 1, 1957 and December 31, 1958, projects totalling more than $106 million were placed under contract. North Carolina is at the forefront of the entire nation in progress on the interstate highway program. Over 1200 miles of secondary roads have been paved and 1400 more miles have been improved at a cost of $24 million during this period. By December, 1959 an additional 817 miles of secondary roads will be paved and 616 miles will be improved at a cost of $16 million.

Some modification of present laws relating to urban streets and highways designed to aid municipalities will be submitted to the General Assembly.

Highway Safety

Our Department of Motor Vehicles has received national acclaim for its program of highway safety. Yet each year in our State more than 1,000 persons are killed and a staggering toll of injuries and economic losses is caused by highway accidents. I urge that the General Assembly give careful consideration to the proposals which the Department of Motor Vehicles will submit to advance highway safety.

Administration of Prison System

Commendable improvements in prison administration have been achieved during the current biennium. There is an ever-increasing number of prisoners within the system. It is estimated that by 1970 there will be 15,000 male prisoners, an increase of nearly 50% over the present. It is imperative that we make maximum use of probation and parole consistent with public safety and a sound rehabilitation program. New legislation is urgently needed to provide constructive employment for additional prisoners. I recommend amendment of the 1957 work-release law to permit an increased flow of suitable prisoners to this program.

Election Laws

I endorse the suggestion of the State Board of Elections that the primary election be advanced from the last Saturday in May to the last Tuesday in June. Because of the abuses under the civilian absentee-ballot law, that law should be repealed.

The School Problem

North Carolina has proceeded calmly and wisely with an approach of local control and responsibility in dealing with the school segregation problem. If a better course of action appears, I shall bring the matter before the General Assembly.

Reorganization of State Agencies

I urge the General Assembly to give thoughtful attention to each of the eleven separate reports of the Commission on Reorganization of State Government.

(1) Utilities Commission. I endorse the Reorganization Commission's recommendation that the membership of the Utilities Commission be reduced from five to three, and I personally recommend that compensation and retirement provisions for members be equivalent to that of Superior Court judges, irrespective of action on reducing the membership.

(2) State Legislative Building. I agree that the State needs a new legislative building, and that the present Capitol building should be carefully preserved. The legislative building should be erected close to the Capitol Square. Specific recommendations will be included in the budget message.

(3) State Board of Alcoholic Control. I heartily endorse the Commission's recommendation that the chief administrative officer of the State Board of Alcoholic Control not be the chairman but a full-time director chosen by the Board. I join with the ABC Board in recommending that the membership of the board be increased from three to five members. The director should be more nearly a career official. The failure of the General Assembly, session after session, to authorize a Statewide liquor referendum indicates that you feel that no change should be made in the present control system. Under these circumstances, I suggest that there be strict and impartial enforcement of all laws affecting liquor, wine and beer.

Tax Law Study

The report of the Tax Study Commission deals mainly with the property tax. It points out that the ratio of assessed value to market value varies considerably between counties and within the same county; that different types of property are assessed at different percentages of market value within a given county; that there is a growing tendency for counties to engage in tax competition through exemption of particular types of property, and that the quadrennial revaluations required by general statutes are not accomplished in any county. I urge consideration of the Tax Study Commission's recommendations as to these matters.

Municipal Government Study

The Municipal Government Commission predicts that by 1980 an additional 1½ million people will be living in and around our towns and cities. This will make North Carolina an urban state. We must have better cooperation between the State and counties and cities, and must give more emphasis to community planning and to an adequate municipal tax system. The Municipal Government Commission concluded that the present municipal tax system will be adequate if the recommendations of the Tax Study Commission are effectuated.

Constitutional Revision

Two of the most important reports to come before the General Assembly are from the Constitutional Study Commission and from the North Carolina Bar Association Committee which has been studying our courts. These two reports will be the subject of a special message to the General Assembly at a later time.

Authorizes Director of Budget to supervise expenditure of appropriations and to make transfers and changes between them.

Authorizes for above improvements $9 million issue of serial bonds which mature in maximum of 20 years and bear interest of not more than 4% per year (as fixed by Treasurer with approval of Governor and Council of State) payable semi-annually. Governor and Council of State determine manner in which bonds are offered for sale. Authorizes Treasurer to sell bonds at one time or

from time to time at best obtainable price, but not for less than par and accrued interest (when conditions are equal, citizens of N. C. get preference). Necessary expenses of sale are to be paid from proceeds in excess of appropriations or from Contingency and Emergency Appropriation. Authorizes Treasurer (with consent of Governor and Council of State who determine rate of interest and time of payment) to borrow money, executing notes: (a) in anticipation of sale of bonds herein authorized when Treasurer postpones their issuance; (b) for payment of interest or principal of such bonds if the Treasury has insufficient funds; or (c) for renewal of these same loans. Provides that funds derived from sale of bonds herein authorized be used in payment of such anticipation notes and renewals, and that funds provided by General Assembly for payment of interest or principal of bonds be used in payment of interest and principal of notes and renewals executed to provide payment of interest and principal of bonds. Pledges full faith, credit and taxing power of State for payment of interest and principal on bonds and notes; exempts them from state and local taxation; and declares them to be lawful investments for fiduciaries and sinking fund commissions.] To Appropriations.

SB 13 - Introduced by Copeland

"To authorize the issuance of $29 million of bonds of the State to provide for capital improvements for state institutions and agencies subject to a vote of the qualified voters of the State." [Identical with HB 11, digested in the House section of today's bulletin.] To Appropriations.

SB 14 - Introduced by Copeland

"To make appropriations for the maintenance of the State's departments, bureaus, institutions, and agencies, and for other purposes." [Identical with HB 9, digested in the House section of today's bulletin.] To Appropriations.

SB 15 - Introduced by Blue

"To amend and supplement 'The Revenue Act,' being Subchapter 1 of Chapter 105 of the General Statutes." [Amends Revenue Act as follows: Withholding tax and declaration of individual income, Art. 4A. Adds Art. 4A to GS Ch. 105 to provide for withholding of income taxes from wages (except pay for agricultural labor and domestic service) and filing of estimated income and payment of income tax by individuals. Requires each employer who pays wages on or after Jan. 1, 1960, to withhold from the wages of each employee an amount which, approximately equals the income liability of employee under income tax article after making allowance for personal exemptions and after making allowance for withholding purposes of 10% of wages (not exceeding $500 per employee). Manner of withholding and amount to be withheld from wages are to be determined in accordance with tables, rules and regulations of Commissioner, but reimbursement of employee for ordinary and necessary expenses incurred by employee in furtherance of employer's business is not to be considered as wages.

Employees receiving wages are entitled to usual income tax exemptions and are required to furnish employer with signed withholding exemption certificate (if certificate is not filed deductions are to be made as if employee were single person without exemptions). Employers who are required to withhold from employees' wages are required to make return and pay over to the Commissioner, by last day of month following end of each quarterly period, amounts required to be withheld. Transient employers are required to make returns monthly by last day of month following month for which deductions were withheld. Employers who fail to withhold or to pay over to the Commissioner sums required by Article are made individually liable. Employers are required to furnish employees with duplicate copies of written statement (by Jan. 31 of next succeeding year or upon date of last payment if employment is terminated before end of calendar year) showing total amount of wages and total amount of tax withheld. Refunds for overpayment by employers are to be made to employer only to extent that overpayment was not deducted

from wages, and carry interest of 4% per annum computed from date 90 days after date of overpayment. Amounts withheld are credited against the income tax liability of each employee; to obtain such credit employee must file withholding statement with annual income tax return.

On and after Jan. 1, 1960, when no part of income consists of wages (and taxpayer can reasonably expect income in excess of $200 after exemptions), or when income consists of wages and other income (and net taxable income can reasonably be expected to exceed $200) taxpayer is required to file a declaration of estimated income and estimated tax for taxable year. Declaration of income must be filed by April 15 of taxable year except where expectancy of income accrues after April 1. Sets out detailed schedule for filing declarations after April 15, for filing amended declarations, and for paying tax. Individuals whose estimated gross income from farming (including oyster farming) is at least two-thirds of total estimated gross income may file by Jan. 15 of next taxable year, in which case total tax must be paid with declaration. Declaration of estimated income must be affirmed by taxpayer (or other person making declaration) and wilful affirmation of declaration (amended declaration or return) which affirmant does not believe to be correct is made a misdemeanor punishable by fine not to exceed $1,000, by imprisonment for not to exceed six months, or both. Penalty for underpayment of tax is fixed at 6% per annum and detailed provisions for determining underpayment are included. Overpayment refunds will be made when disclosed by taxpayer's annual return. Employers who fail to withhold required amounts or who fail to make returns or remit to the Commissioner are subject to penalty of 25% of amount that should have been withheld and turned over to Commissioner(for each such failure). Wilful failure to collect or to pay over tax and wilful failure to file declaration (or amended declaration), or to pay estimated tax (in addition to other penalties provided) is made a misdemeanor punishable by a fine not to exceed $500, by imprisonment not to exceed six months, or both.

Franchise Tax, Art. 3, Schedule C: Amends GS 105-116 through 105-120 to require franchise tax reports on electric light, power, street railway, street bus, gas, water, sewerage and other similar public service agencies, Pullman, sleeping, chair and dining cars, express companies and telegraph and telephone companies to be made on affirmation (now oath). SUMMARY OF GOVERNOR HODGES' BUDGET MESSAGE

Delivered to joint session of the General Assembly
of North Carolina at 8:00 p.m., February 9, 1959

The total recommended expenditures for operations and capital improvements (including receipts from the Federal Government and other sources) of $1,214,925,934 may be broken down into major subheads as follows: (1) $754,078,551 for operating expenses for General Fund agencies and institutions ($192,880,662 to be realized from agency receipts including Federal funds and $561,197,889 from tax and non-tax revenues and use of credit balance), (2) $354,211,054 for operating expenses for Highway Fund agencies ($57,139,132 to be realized from receipts including Federal funds and $297,071,922 from highway taxes, fees and use of credit balance), and (3) $45,374,149 for capital improvements most of which we recommend to be secured from bond sales. Included in the total figure "is the amount of $61,262,180 from other special funds such as Employment Security Commission, University Enterprises, Wildlife, Banking, etc."

The amounts recommended are much smaller than requested. To grant all requests of General Fund Agencies and institutions would necessitate an undesirable increase in the tax burden of all North Carolinians.

Of combined "A" and "B" Budget requests for General Fund appropriations we recommend approximately 10% above estimated General Fund expenditures for present biennium. Some seriously needed "B" Budget requests are recommended. The recommended increase of 10% requires a justifying explanation which I shall try to give you.

PUBLIC SCHOOLS

By far the greatest portion of the recommended budget is for public education. The increase in student enrollment during the next biennium will require an increase of approximately $15-1/2 million to pay the new teachers necessary to continue our public schools on the same basis as at present. We are not content to provide merely for continuation. We recommend increasing minimum starting salaries for "A" certificate teachers to $3,100 (now $2799) and comparable increases in starting salaries for certain other teachers. We recommend paying teachers for the extra week's work before opening and after closing of regular term to insure a full teaching program. To improve the quality of teaching, we recommend appropriations for needed supervisory personnel in the Department of Public Instruction.

HIGHER EDUCATION

An increase of approximately 10% above estimated expenditures for present biennium is recommended for operating funds in area of higher education. Included are selective faculty salary increases totalling $1,500,000 recommended to be distributed by Presidents of institutions subject to approval of Director of Budget. The faculty work loads must be equalized between institutions if the State is to absorb the large expected enrollment increase.

INDUSTRIAL EDUCATION

We recommend expansion of the industrial training program authorized by the 1957 General Assembly. Pursuant to a plan submitted by the State Board of Education, seven Industrial Education Centers have been established and we recommend appropriations for 11 more. The total appropriations recommended for public schools (including vocational education) and higher education amount

to approximately $418,750,000 or 74.6% of the entire recommended General Fund appropriations.

NATURAL RESOURCES AND INDUSTRIAL DEVELOPMENT

Appropriations of approximately $4-3/4 million are recommended for operations of the Department of Conservation and Development. To take advantage of the success achieved in the industrial development program, we recommend increased amounts for advertising and promotion. To supplement private donations exceeding $1-1/2 million for the Research Institute of the Research Triangle, we recommend that the State contribute $200,000 for the purchase of equipment. I know of no other activity of more potential value for the development of the State and the welfare of its people.

The destruction of our protective outer banks is a serious problem; something must be done quickly. We recommend appropriations of $200,000 for surveys and engineering studies, and $400,000 for purchases of land by the State to make us eligible for Federal financial assistance in meeting the problem.

STATE PERSONNEL MATTERS

We have given much attention to salaries and employment conditions of State employees and conclude that the State treats its employees well. Salaries are reasonably competitive and increased 17.98% between 1956 and 1958. We do recommend a biennial appropriation of $2 million ($1,400,000 from General Fund and $600,000 from Highway Fund) for necessary upward adjustments in salaries of jobs subject to State Personnel Act. For all employees, including teachers and college personnel, we recommend for the next biennium approximately $16 million for salary adjustments in addition, including $4,043,833 for regular merit salary increments for employees subject to the Personnel Act; $1,525,000 for college professional personnel; $1,968,612 for increasing beginning teachers' salaries; $1,556,000 for automatic increments for school personnel; and $6,899,556 for the extra week's pay for teachers.

I recommend that the State continue matching employees' retirement contributions until the employee reaches age 65 [now ceases when employee reaches 60] and that the minimum payment to retired employees drawing pensions or retirement benefits be made $70 [now $60]. I also recommend increasing per diem allowances for travelling State employees from $8 to $9 for in-State travel and from $11 to $12 for out-of-State travel. [Budget Appropriations Bill does not provide for these increases.] I recommend that moving expenses of State employees required to move their residences for the convenience of the State be paid by the State. The cost of these proposals can be absorbed in the amounts presently recommended in the budgets of the various agencies.

I recommend that the General Assembly make provisions for a study of the problem of longevity pay for State employees and that specific proposals be considered by the General Assembly at its next session.

OTHER GOVERNMENTAL ACTIVITIES

In the area of General Government we recommend a 7.3% increase in operating appropriations; in Public Welfare, 7.7%; Department of Agriculture (including both General Fund and Agriculture Fund appropriations), 8.5%; Public Safety and Regulation (including Dept. of Labor, Motor Vehicles, Civil Defense, etc.), 8.5%; for Health and Hospital agencies, 9.8%; for correctional schools, 21.6%.

AGENCIES SUPPORTED BY HIGHWAY FUND

Recommended appropriations from the Highway Fund for the Highway Dept. during the next biennium amount to $235,166,605. Motor transportation is growing very fast in North Carolina and as our communities and economy expand, more and

more money will be needed to take care of highway maintainance and construction if we are to have the modern highways demanded of a growing and progressive state. Highway revenues as a whole are estimated to increase 7.4% over the next biennium, but under our present laws, the Highway Department itself will receive an increase in funds of only 1.1%, and the balance goes for support of non-highway agencies (Probation, Paroles, and Prison). Serious consideration should be given this problem.

We recommend for the Probation Commission an increase for the next biennium of $221,034, or 29.1%, not only for worthwhile humanitarian results but also to keep down our Prison population and the cost of these operations.

For the same reasons, we recommend an increase of $172,186, or 31%, for the Paroles Commission.

Even though it would be more economical to rely more on modern machinery for highway work, still it would be unwise as a matter of prison policy to take prisoners off highway work. Therefore we must continue to assign 7,000 of them to the Highway Department at a cost of $5.00 per day per prisoner for a total cost of $17,570,000 for the biennium.

Highway Fund appropriations recommended for the Department of Motor Vehicles amount to an increase of 9%. In this increase we have provided for 25 new patrolmen to help take care of traffic growth and new duty assignments.

In addition we must provide approximately $29-3/4 million to the Highway Bond Debt Service Reserve and $14 million to Reserve for State Aid to Municipalities.

CAPITAL IMPROVEMENTS

For General Fund agencies and institutions we recommend Capital Improvements totalling $42,765,000, and we propose that this amount be raised by the issuance of bonds [$38,000,000] and reappropriation of the Revolving Fund [$4,765,000] which was set up in 1957. Of the total improvements recommended, slightly in excess of $25 million is for education, and approximately $21-1/2 million is for higher education.

Since the heaviest period of the expected large increase in college enrollment will occur during the next four or five years, we feel strongly that our recommendations constitute the minimum that the 1959 General Assembly should provide for capital improvements at our institutions of higher learning.

Included in our total recommendations for capital improvements are projects for hospitals (primarily mental institutions), costing approximately $8 million. These projects include a large expansion at Butner Training School, and extensive renovations at Morganton and at the State Hospitals at Raleigh and Butner.

We have also included in our recommendations the sum of $4-1/2 million for a new Legislative Building. The Advisory Budget Commission and I, along with the Commission on Reorganization of State Government, feel that now is the time to do something about this very serious problem of the trying conditions under which the members of the General Assembly are required to work.

We recommend that no change be made in the present Capitol building, but that it remain as a museum or monument to the greatness of North Carolina.

The recommendation which we have included for land acquisition will give us space for further building needs for many years to come.

GENERAL FUND REVENUES

Except for some minor administrative changes which will not appreciably affect total revenues, we do not recommend any other changes in our tax laws, nor do we recommend any increase in existing rates. On the basis of available economic data, it now appears that we are in for a period of favorable economic progress; therefore, we feel justified in estimating a General Fund Revenue increase of 6.3%. Even with this increase we will need an additional $27-1/2 million, and it is our recommendation that this amount be secured by the

adoption of a withholding and "pay-as-you-go" plan in connection with the State income tax. This plan, together with the increased revenues, will make new taxes unnecessary.

As already mentioned, we are of the opinion that the Capital Improvements program should be financed by a reappropriation of the Revolving Fund and by the issuance of bonds.

SCHOOL INCENTIVE FUND

It is proposed that a State School Incentive Fund of $10 million be set up for each year to be matched by local communities in accordance with their ability to pay. This proposal comes from the Commission on Public School Finance and is one of the most important recommendations I make to you. It does not transfer any load from the State but simply adds more money to strengthen our schools. The $10 million made available by the State annually would bring forth an estimated $6-1/2 million yearly when matched by local communities. Because of the time needed to set up necessary machinery, the $10 million should be made available beginning in the second year of the biennium. This $10 million is not figured in our revenue estimates, but I would like to see the necessary appropriations made. If economic conditions do not improve so that the necessary funds cannot be secured by raising revenue estimates, I will join you in recommending the levying of sufficient taxes to provide the needed amount. Our schools need this incentive approach; they are already too close to the bottom in our nation in many financial respects. All of the proposals presented relating to school financing could result in a percentage increase of 16.7% in teachers' salaries over those of the present biennium.

GOVERNOR'S SALARY

The Governor's salary of $15,000 has not been increased since 1949 while salary levels generally have risen steadily, and several State positions carry larger salaries than the Governor's. In keeping with the dignity and prestige of the office, we recommend that starting with the next Governor, this salary be raised to $25,000 per year.

HB 60 - Introduced by Umstead and others

"To enact the Interstate Compact on Mental Health." [Provides for Interstate Compact on Mental Health so that proper and expeditious treatment

of mentally ill and mentally deficient can be facilitated through cooperative efforts of party states. Compact provides for: (1) institutional care and treatment for mental illness in member states irrespective of residence, settlement or citizenship qualifications; (2) transfer of patient to institution in another member state based upon clinical determination that care and treatment would be facilitated by transfer; (3) advance notice to receiving state prior to such transfer and recognizing admission priorities of receiving state. Whenever, pursuant to laws of state in which patient is physically present, it is determined that patient should receive after-care or supervision such may be provided by receiving state. Notice of escape of dangerous patient is to be given in manner to facilitate speedy apprehension of patient. Duly accredited officers of compact states are permitted to transport patients being moved pursuant to compact through any state in compact. Cost of transportation of patient is to be borne by sending state but member states may arrange different allocation of costs. Compact does not alter or affect internal relationship among departments, agencies, and officers in government of party state or prevent member states from asserting rights against others for costs for which state may be responsible under compact. Compact does not abridge, diminish or impair rights, duties and responsibilities of guardian of any patient except that where transfer to another jurisdiction makes it advisable that supplemental or substitute guardian be appointed,any court of competent jurisdiction in receiving state may make such appointment and upon being advised of such appointment,previous guardian (after accounting) is relieved of power and responsibility appropriate to the circumstances. Provisions as to after-care are not applicable to persons institutionalized under sentence in penal or correctional institution or while subject to trial on chargewhich, in absence of mental illness or deficiency, would subject person to incarceration in penal or correctional institution. Compact establishes policy that no mental patient shall be placed or detained in prison, jail or lockup but that such patient be taken promptly to suitable institution. Member states are to appoint "compact administrators" who on behalf of their respective states shall act as coordinator of activities under compact and have power to promulgate reasonable rules to carry out compact terms. Act designates Commissioner of Mental Health as compact administrator with power to enter into supplementary agreements with other member states for provision of service or facility or for maintenance of institutions on joint or cooperative basis. Member state may withdraw from compact by repealing enactment act but withdrawal will not affect status of any patient who has been sent to or out of such state under compact provisions. Supplementary agreements for use of facility in state must have approval of head of dept. or agency having jurisdiction over facility. Compact administrator, (subject to approval of Governor) may make or arrange for payments necessary to discharge obligations imposed on State by compact (or supplementary agreement thereunder) and must consult with immediate family of transferee and in case of transfer from institution in state to institution in another state, approval of Superior Court in county in which patient is located must be secured. Effective July 1, 1959.] To Mental Institutions.

PUBLIC BILLS INTRODUCED -- SENATE

SB 94 - Introduced by Bell and others

"To amend the Constitution of North Carolina by rewriting Article IV thereof and making appropriate amendments of other Articles so as to improve the administration of justice in North Carolina." [Rewrites Article IV (Judicial Department) to establish court system as follows: Structure -- vests judicial authority of State (other than that vested in administrative agencies and impeachment court) in a unified General Court of Justice consisting of appellate division, Superior Court division, and local court division. Appellate division consists initially of 7-member Supreme Court; General Assembly may increase membership to nine, and may, upon recommendation of Supreme Court, establish an intermediate Court of Appeals. Superior Court division consists of present Superior Courts. Local court division consists of district courts (sitting in at least one place in each county) which will replace all existing courts inferior to Superior Court; each district court will have at least one judge, and in each county at least one magistrate.

Jurisdiction -- Supreme Court will by uniform rule allot jurisdiction of General Court among various division, but may not (without consent of General Assembly) assign to district courts ordinary civil cases involving more than $5000, or criminal cases involving felonies; but cases involving special subject matters (juveniles, condemnation, etc.) may be assigned to district court, regardless of amount or offense involved. Magistrates may be given any part of jurisdiction of district court. Clerks of Superior Court may be assigned original jurisdiction in discretion of Supreme Court. Limits fixed by Court rule may be waived in civil cases.

Procedure -- Supreme Court has exclusive authority to make rules of practice and procedure for all divisions of General Court; no rule may abrogate or limit right of jury trial, and no rule may be finally adopted without prior publication and opportunity for public hearing. Judicial Council will act as advisory body to Supreme Court in promulgating procedural rules. Supreme Court will provide proper system of appeals; but there is absolute right of final appeal to Supreme Court in cases involving Constitutional questions or penalties of death or life imprisonment. Appeals from magistrates must be heard de novo.

Administration -- Supreme Court is authorized to make administrative rules to govern General Court. Chief Justice, as executive head of Supreme Court, is responsible for administration of General Court, and will be assisted by an Administrative Office of the Courts. Judicial Council will act as advisory body to Supreme Court on administrative matters. Courts will be financed by State; costs and fees will be fixed by General Assembly and will be uniform throughout state; revenues from costs and fees will go to State, which may reimburse local governments for quarters, police officer services, etc.; fines and forfeitures will continue to go to local schools. Supreme Court will establish district lines and fix seats of district court.

Judges -- Supreme and Superior Court judges will be elected as at present; Court of Appeals judges will be elected in same manner. District judges will be appointed by Chief Justice for 4-yr. terms and magistrates for 2-yr. terms from nominations by resident Superior Court judge. Compulsory rotation of Superior Court judges is eliminated; Chief Justice authorized to assign judges of trial courts, and to assign Superior Court judges to temporary duty with any other court, and to assign Court of Appeals judges to temporary duty with Supreme Court.

Juries -- General Assembly by general law will provide for jury commissions, with uniform powers and duties, in each county. Jury trial may be waived in all civil cases and in all criminal cases other than those in which sentence of death or life imprisonment might be imposed; waiver in criminal cases must be in writing, and in felonycases must be agreed to by counsel for accused and judge. General Assembly may, upon recommendation of Supreme Court, provide 6-man juries in district courts, and 5/6 verdicts in civil cases.

Solicitors -- District solicitors are responsible, under supervision of Attorney General, for prosecution of crime in all courts in district. Attorney General authorized, upon recommendation of solicitor, to appoint assistant solicitor(s) from nominations by solicitor. Attorney General responsible for recommending redistricting to General Assembly whenever he determines there is serious imbalance in solicitorial workloads.

Miscellaneous -- Amends other Articles of Constitution to make jury trial and local court provisions conform to Art. IV, and to eliminate references to justices of peace and coroners. Provides for submission of proposed amendment at next general election.

Schedule -- Immediately upon certification that people have ratified amendment, Supreme Court is vested with procedural and administrative powers, Administrative Office of Courts will be established, and Supreme and Superior judges will hold same rank within General Court. Supreme Court will proceed as rapidly as practicable to define local court districts and establish district courts therein. Until a district court is established in a county, all courts of that county continue under existing financing and jurisdictional provisions; when district court is established, all courts of county become part of General Court and recorder-type judges become district judges for remainders of terms. When district courts established in every county, amendments will be fully effective; this must be accomplished not later than Jan. 1, 1969.] To Constitution.

Adds GS 114-8.1 to authorize Attorney General to call solicitors and assistants into conference to discuss their duties, and requires that they cooperate with and aid Attorney General in the performance of his duties. Amends GS 7-44 to place solicitors (after Jan. 1, 1963) on full-time basis at annual salary of $11,000 (now $7,396); any solicitor may elect, by giving notice to Attorney General within 90 days after ratification of act, to receive $11,000 salary at once, in which case he may not engage in private practice after Dec. 31, 1959. Amends GS 7-68 to require AG, when he determines that there is serious imbalance in workloads (or other good cause) to recommend solicitorial redistricting to General Assembly. Effective July 1, 1959.] To Courts and Judicial Districts.

SB 99 - Introduced by Currie of Durham and Warren
"To amend, alter and rewrite the Constitution of North Carolina." [Rewrites entire Constitution of North Carolina to make following changes (only major substantive changes are noted):

Art. I, Declaration of Rights: Adds guarantee of freedom of speech.

Art. II, Legislative Department: Increases Senate membership from 50 to 60, effective for 1965 session. Requires that by 60th calendar day of 1963 regular session and of first regular session convening after return of every federal census, a committee (President and President pro tempore of Senate and Speaker of House) submit to General Assembly a proposal for redistricting Senate; if General Assembly does not amend proposal, it has effect of law on adjournment of session. Requires that by 60th calendar day of first regular session convening after return of every federal census, Speaker of House shall reapportion House, his act having force of law. Increases per diem of members of General Assembly from $15 to $20, and that of presiding officers from $20 to $25. Authorizes either house to adjourn

of its own motion for not more than three days. Permits first reading of revenue bill in one house on same day third reading was had in other house. Requires General Assembly to provide for organization, government, and boundaries, and authorizes it to provide for powers, duties, consolidation, and dissolution of counties, cities, towns, and other governmental subdivisions.

Art. III, Executive Department: Requires officers of Executive Department and of state institutions to report to Governor at least 30 (now five) days before each regular legislative session. Requires General Assembly to prescribe order of succession to governorship beyond Lieutenant-Governor. Authorizes General Assembly (after notice and opportunity for hearing) to find (by 2/3 vote of membership of each house) that Governor is physically or mentally incapable of performing his official duties, and to find (by majority vote) that Governor has regained his physical or mental capacity; and authorizes majority of Council of State to convene General Assembly when necessary to make such determinations. Authorizes Governor, during vacancy in office of Attorney General or Council of State member, to appoint acting officer. Authorizes General Assembly to prescribe procedures for determining physical or mental incapacity of Lieutenant-Governor, Attorney General, or Council of State member, and restoration of such .. capacity.

Art. IV, Judicial Department: Vests judicial power of State (other than that vested in administrative agencies and impeachment court) in a General Court of Justice composed of appellate division, Superior Court division, and division of local trial courts. Appellate division consists initially of 7-member Supreme Court; General Assembly may increase membership to nine and may, upon recommendation of Supreme Court establish an intermediate Court of Appeals (General Assembly to determine its structure and organization and Supreme Court to determine its jurisdiction and when and where it shall sit). Authorizes General Assembly to require judges to rotate among districts within a division.

Requires General Assembly to provide for division of each Superior Court judicial district into local court districts and prescribe where District Courts shall sit in each county, to provide by uniform general law for selection of Chief District Judge and necessary Associate District Judges for each local court district for 4-year terms, to determine number of Associate District Judges and Trial Commissioners. Creates (as officers of District Courts) one or more Trial Commissioners per county, to be appointed by Superior Court Judge from nominations submitted by Chief District Judge. Abolishes all existing courts not created or authorized by proposed Constitution on Jan. 1, 1965 (or at such earlier date as General Assembly fixes), and requires legislative provision for transfer of all cases then pending in such courts. Prohibits General Assembly from creating any court not authorized by Art. IV. Authorizes Chief Justice in public interest to assign any Superior Court judge to hold court in any district (senior Associate Justice to exercise such assignment power during absence or incapacity of Chief Justice).

Authorizes Supreme Court by rule to vest in Court of Appeals (if established) part of appellate jurisdiction of Supreme Court, but guarantees right of final appeal to Supreme Court in all cases involving Constitutional question and cases wherein sentence of death or life imprisonment is imposed. Retains Superior Court as court of original general jurisdiction except as otherwise provided by law, and authorizes General Assembly by uniform general law to fix jurisdiction and powers of Clerks of Superior Court, District Courts, and Trial Commissioners, and to establish appeals system (appeals from Trial Commissioners must be heard de novo with right of jury trial). Retains power of Supreme Court to make rules of procedure for appellate division and of General Assembly to make rules of procedure for all other courts. Permits waiver of jury trial in all civil cases, and in all criminal cases except those involving felonies punishable by life imprisonment or death; waiver in felony cases is with consent of trial judge and defendant's counsel; waiver in misdemeanor cases is with consent of trial judge alone. Requires General Assembly to provide by uniform general law for listing and drawing of jurors.

Requires that Supreme Court Justices, Judges of Court of Appeals (if established), and regular Judges of Superior Court be elected by voters for 8-year terms. Requires Attorney General to advise General Assembly when revision of solicitorial districts is necessary; makes Solicitor responsible for all criminal prosecutions in Superior Courts of his district, aiding Attorney General (on request) with appeals therefrom, advising officers of justice in his district and performing other duties prescribed by law; and requires General Assembly to provide by uniform general laws for prosecution of criminal actions in all inferior courts.

Requires General Assembly to provide for establishment of statewide uniform schedule of court fees and costs, and to fix compensation of all officers provided for in Art. IV (compensation of judge or Trial Commissioner must not depend on his decision or on collection of costs). Repeals provisions creating offices of Clerk of Supreme Court, coroner, and constable.

Art. V, Revenue, Taxation, and Public Debt: Requires that every classification of property or other subject of taxation and every tax exemption be uniformly applicable throughout State, and forbids General Assembly to delegate its exclusive classification power, except that it may delegate to county and municipal governing boards power to classify trades and professions for local license tax purposes. Changes minimum income tax exemptions. Adds county property to that mandatorily exempt from taxation. Prohibits General Assembly from delegating its exclusive property tax exemption power. Repeals specific authority of General Assembly and of municipalities to levy capitation taxes (and limits thereon), and specific authority of General Assembly to tax trades, professions, and incomes (General Assembly can still levy or authorize such taxes under its plenary taxing power).

Requires that any new or revised Constitution or constitutional amendment (s) adopted by a Convention be submitted to voters for approval at time fixed by Convention. Authorizes General Assembly to submit a new or revised Constitution or constitutional amendment(s) to voters at any time fixed by General Assembly.

Makes admissible in such prosecutions evidence of alcohol in defendant's blood as shown by chemical analyses of blood,urine, breath or saliva taken within 2 hours after alleged offense. If test shows 0.05% or less alcohol, it is prima facie evidence that defendant was not under influence of intoxicating liquor; if between 0.05-0.15%, it is relevant (not prima facie) in indicating whether defendant was under the influence; if 0.15% or more, it is prima facie evidence that defendant was under the influence. Operation of motor vehicle in NC deemed consent to described chemical tests administered at direction of police officer having reasonable grounds to believe operator driving under the influence; only physician acting at police officer's request can withdraw blood (limitation not applicable to other tests); person tested may obtain results of test on request and may have physician of own choosing administer additional test. Refusal by arrested person to submit to test empowers Motor Vehicles Dep't to suspend (for maximum of 12 months) driving permit or nonresident operating privilege (upon sworn

report by arresting officer of such refusal plus statement that officer had reasonable grounds to believe operator was driving under influence); person under suspension may request hearing under GS 20-16(c) (re procedure for suspension hearings) and may appeal from adverse hearing decision to courts as provided in GS 20-25 (general motor vehicles appeals procedure).] To Public Roads.

[Adds provision to cited section expressly authorizing Motor Vehicles Dep't with or without hearing to issue new operator's or chauffeur's license to person whose license was permanently revoked for driving while license suspended or revoked, on proof of former licensee's three years' good behavior plus conduct and attitude justifying favorable consideration (now merely authorizes application for such relief.) [Amends cited section to give Superior Court concurrent original jurisdiction in all criminal actions of which original jurisdiction is now or hereafter vested in JP's or other courts inferior to Superior Court.

Jurisdiction is to be exercised by court first taking cognizance of case. Where appeal is taken from inferior court to Superior Court, defendant may be prosecuted in Superior Court either on original warrant or on bill of indictment which shall include, but not be limited to offense(s) charged in warrant on which inferior court trial was had (thus apparently eliminating "derivative jurisdiction" concept in appeals from inferior courts). SUMMARY OF GOVERNOR HODGES' SPECIAL MESSAGE ON CONSTITUTIONAL REVISION

Delivered to joint session of the General Assembly
of North Carolina at 12:00 noon, February 5, 1959

Governor Hodges reviewed the history of constitutional change in North Carolina and noted that 135 amendments have been approved since the basic Constitution of 1868 was adopted. He agreed with the Constitutional Study Commission that a revision of the whole Constitution was needed.

Art. II. Legislative Department. Governor Hodges did not endorse any particular plan of redistricting and reapportionment of the General Assembly, but noted that no reapportionment had taken place since 1941, and urged that action be taken to insure that periodic reapportionment would be made.

Art. III. Executive Department. The Governor approved the Study Commission's provisions with respect to succession in the Executive Branch. He added that he thought that the Governor should be allowed to run for a second consecutive term, and that he should have the veto power.

Art. V. Revenue, Taxation and Public Debt. The Governor approved the Study Commission's suggested revision for tax administration improvement.

Art. VII. Education. Governor Hodges reviewed the background of the Study Commission's deletion of the provision for a general and uniform system of public schools, and stated that the provision should be retained.

Art. IV. Judicial Department. Governor Hodges noted the work of the NC Bar Association's Court Study Committee, and characterized it as one of the most complete and thorough court studies ever made in the United States. He noted the lack of uniformity in lower courts, the use of courts as revenue-producing agencies, the fact that the compensation of JP's depends upon their finding the defendant guilty in criminal cases, increasing backlogs of cases in Superior Courts and legislative fixing of court terms two years in advance as among the major problems requiring attention.

He did not compare the details of the different drafts submitted by the Constitutional Study Commission and Court Study Committee. He described the following objectives of the Court Study Committee as "laudable": (1) a single uniform court organization; (2) the Chief Justice as executive head of the court system, with administrative responsibility; (3) a Judicial Council with some lay members to advise the Chief Justice and act as liaison agency between court and people; (4) power in the Supreme Court to make rules for the mechanics of operating the courts and for trying cases in them; (5) a uniform method of judicial selection for the lower courts; and (6) jury commissioners functioning under supervision of the Superior Court judge.

The Governor stated that he favored the election of district court judges, but would leave this matter to the General Assembly.

He stated that the proper administration of justice in every individual court is a matter of concern to the whole state, and that the State must provide a just, uniform and efficient judicial system. If there is to be real improvement in our courts, responsibility for studying the courts and correcting defects must be constitutionally vested somewhere. Because this is essentially a problem of judicial administration, it can best be performed by the Supreme Court. If it is deemed unwise to vest responsibility and authority in the Supreme Court without retaining some legislative control, it is suggested that the authority be vested in the Court, but that the Constitution provide that by a 3/5 vote of both houses the General Assembly could exercise the authority vested in the Court.

The Governor pointed out that the General Assembly would continue to control numerous aspects of court affairs, if the Court Study Committee's plan were adopted. Included among these would be budgetary control.

Finally, the Governor urged that the General Assembly give careful consideration to the Court Study Committee's report and recommendations as to solicitors, and he specifically approved the recommendation that solicitors be made full-time officers.

SB 155 - Introduced by Rose

"Amending and rewriting certain sections of Chapter 139 of the General Statutes relating to soil conservation districts and so as to provide for the establishment of watershed improvement districts." [(1) Classifies 1st 15 secs. of GS Ch. 139 as Art. 1, and adds proposed Art. II. Provides enabling machinery in Art. II for creation of watershed improvement districts, and makes conforming changes in Art. I, concerning soil conservation districts. (2) Art. 1 conforming changes: Rewrites GS 139-2 (C) and (D) to provide that construction of desilting basins, floodwater retarding structures, channel improvements, and floodways is appropriate corrective method to prevent floodwater and sediment damages and to further the utilization and disposal of water; and to declare it policy of legislature to prevent these damages and to further conservation and development of water resources. Amends definition of "petition" and adds pars. defining "landowners", "trustees", "watershed improvement district", "notice" and "Board" (GS 139-3). Makes State Soil Conservation Committee responsible under GS 139-4 for reviewing and recommending priorities on applications for planning assistance under P.L. 566, 83rd Cong., as amended. Excludes from soil conservation district boundaries all town and village lots and government owned or controlled land, as defined (GS 139-5). Gives soil conservation districts additional powers in GS 139-8 to: (a) conduct surveys and investigations relating to soil erosion, floodwater damage, utilization of water, etc., and (b) act within the scope of their authority to prevent floods, to dispose of water and to conserve water resources; requires all forest tree seedlings to be obtained from State Forest Nursery if available. (3) Art. II: Authorizes creation of watershed improvement districts within one or more soil conservation districts upon petition to soil conservation district supervisors (by 100 landowners within proposed district, or majority if total owners less than 200), notice, hearings, advisory referendum and approval by supervisors. (Districts may be expanded or dissolved upon like proceedings.) Spells out requirements concerning petition contents and standards to guide supervisors in passing on petition and concerning conduct of referendum. (Referendum conducted by county comm'rs of counties wherein any part of district lies, or their designees, on basis of registration made by soil conservation supervisors; general election law procedures used in most respects; petitioners pay election costs and furnish deposit therefor.) Supervisors appoint interim board of trustees to govern watershed improvement district; permanent trustees elected for 6-yr. staggered terms at next general election 180 days or more after such appointment. Nominations are by petitions signed by 25 landowners within district (or 1/3 of owners if total less than 75); nominating petitions presented to supervisors for determination of validity; election boards of each county wherein any part of district lies provide for new registration and conduct elections under usual

general election procedures (details spelled out). Supervisors fill vacancies in trustee membership occurring otherwise than by expiration of term; trustees select own officers, receive $7 per diem plus meetings expenses. Watershed improvement district is political subdivision of State with all powers of soil conservation districts, and power to levy benefit assessments to defray any district expenses, including an initial assessment and subsequent annual, biennial or triennial assessments; maximum annual assessment rate may not exceed $5 per acre. Bill sets out detailed provisions, modelled on drainage district (GS Ch. 156) and municipal parking assessment (GS 160-504) procedures, for classification of lands for assessment purposes and hearings thereon, estimates of district expenses, preparation of assessment rolls and hearings thereon, correction of assessments, appeal procedures, payment of assessments in cash or installments, collection of assessments by county tax collectors upon the basis of receipts prepared by district trustees, and enforcement of such collections (including interest on unpaid assessments). (5) In case of such a distribution or exchange of stock in a controlled corporation (one with respect to which at least 80% of combined voting power of all classes of stock entitled to vote, and of total shares of all other classes of stock, is owned by distributing corporation), proper allocation with respect to earnings and profits of distributing and controlled corporations shall be made under regulations prescribed by Comm'r of Revenue under GS 105-262. [Authorizes incorporation of "mutual trust investment company", as defined in U.S. Investment Company Act of 1940, as amended, to constitute medium for common investment of trust funds held in fiduciary capacity (either alone or with one or more co-fiduciaries) by state banks with trust powers, trust companies and national banks with trust powers located in NC. Authorizes not less than five eligible institutions, subject to approval of Comm'r of Banks and to regulations issued by him, to organize mutual trust investment company, which shall be subject to general corporation laws of NC except as specifically modified by act. Articles of incorporation must be signed by at least five officers or directors of participating institutions, and shall list names of institutions and amount of stock subscribed by each. Stock shall be owned by participating institutions but may be registered in name of nominee. Investment company must have at least five directors, all of whom must be officers or directors of stockholding institutions. Investment company may not invest in shares of corporation where total of such shares held by investment company would exceed 10% of outstanding corporate shares. Investment company may reacquire or redeem its own stock, but may not vote its own stock; company is not responsible for ascertaining authority of fiduciary who may purchase its stock. Eligible institutions may, if exercising care as prudent investor, invest fiduciary funds in investment company stock, but may not invest assets of any estate, trust or fund if such estate, etc., would thereby have greater investment in company than Federal Reserve Board Regulations would permit in a common trust fund having equal assets with investment company, or if such estate would thereby acquire more than 10% of assets of investment company (as increased by proposed investment). No institution may invest fiduciary funds if such institution would thereby acquire more than 25% of outstanding stock of company, but may hold stock already acquired even though it may become more than 25% of outstanding stock. Investment companies are permitted to rely on statements of purchasing institution that proposed purchase meets legal requirements.
Authorizes Comm'r of Banks to adopt reasonable rules and regulations

governing records of investment companies, methods of establishing values of shares, procedures for sale and redemption of stock, and other matters relating to conduct and management of company, and gives him same powers as he has with respect to ordinary banks. In such case, review of first attachment may be sought through petition for writ of certiorari filed with Supreme Court. Provisions are applicable to successive violations of order.] To Judiciary 1.

SB 282 - Introduced by Stikeleather and Kirkman

"Appropriating to the State Board of Education ten million dollars for the second year of the 1959-1961 biennium in order to carry out the purposes of the act creating a School Incentive Fund." [Appropriates stated amount as title indicates to carry out purposes of SB 283, which provides for a School Incentive Fund as a supplement to Current Expense Outlay School Funds of the several counties of the State (see digest below).] To Appropriations.

SB 283 - Introduced by Stikeleather and Kirkman

"Amending Chapter 115 of the General Statutes so as to provide for School Incentive Fund as a supplement to the Current Expense Outlay School Funds of the several counties of the State." [Adds Art. 9A to GS Ch. 115 to create School Incentive Fund to encourage and assist counties (by means of grants from Fund to be matched by counties according to their economic abilities) to make more adequate provision for maintenance of public schools. Allocation of Fund to counties to be made on basis of average daily attendance. Establishes formula and procedure for determining the equalized valuation of taxable property in each county. Counties having equalized valuation of $25,000 or more per pupil in average daily membership qualify for School Incentive Fund grant by (1) providing from local sources additional county-wide school current expense funds to match incentive funds, and (2) continuing without reduction in succeeding fiscal years (unless reduction approved by State Bd. of Education) any supplementary appropriation for school current expense purposes provided for fiscal 1958-59. Counties having equalized valuation of less than $25,000 per pupil in average daily membership qualify for grant by (1) providing from local sources additional county-wide school current expense funds in amount which bears same proportion to School Incentive Fund Grant for county as the equalized valuation for that county bears to $25,000, and (2) continuing any 1958-59 supplementary appropriation without reduction in succeeding years (unless reduction approved by State Bd. of Education). Boards of comm'rs may provide less additional current expense funds than requirements set out above but in such case county's grant from Fund is to be reduced proportionally. In computing amount of additional county-wide school current expense funds which must be provided from local funds to qualify for maximum grant from Incentive Fund, State Bd. of Education is required to use as a basis of measurement the amount appropriated in fiscal 1958-59 by comm'rs for school current expense purposes from county-wide revenue sources, exclusive of State and federal appropriations or local supplemental school current expense funds voted by people of county, administrative school unit, or school district therein. Authorizes bds. of county comm'rs to appropriate in county-wide current expense funds budget amounts necessary to match all or parts of maximum amount of School Incentive Fund grants in any fiscal year and to levy sufficient tax to provide funds therefor. State Bd. of Ed. is required (by April 1 of each year) to notify comm'rs of each county of: (1) maximum amount of Fund grants to be available to county, and (2) total amount by which comm'rs must supplement county-wide current expense funds from local sources in order to qualify for maximum grants. County comm'rs are required to notify State Bd. (by Aug. 1, 1960, and annually thereafter) of its acceptance or rejection of available grants, or acceptance of proportionate parts thereof. State Bd. is required to pay over grants from School Incentive Fund in same manner as Nine Months School Fund is disbursed and grants from Fund and additional county-wide funds raised to match Fund grants may be expended only for school current expenses of county. Any balance in School Incentive Fund at end of each biennium is to be paid into State Literary Fund, and State Bd. of Ed. is authorized to make reasonable rules to implement provisions of Article.] To Education.

PUBLIC BILLS INTRODUCED -- HOUSE

HB 773 - Introduced by Sermons and others

"To regulate the operation of watercraft on the waters of the State." [Effective Jan. 1, 1960: (1) Prohibits operation of motorboat (defined as vessel propelled by machinery of over 10 hp., whether or not such machinery is principal source of propulsion, but not including vessels having valid marine documents issued by U.S. Customs Bureau) on waters of NC (defined as those within NC territorial limits and adjacent marginal sea and high seas when navigated as part of journey to or from NC shore) unless boat is numbered in accord with act. Motorboat owner or his agent required to apply annually and pay $3 fee to Wildlife Resources Comm'n for one year certificate of number. Number must be maintained in legible condition on each side of bow; certificate shall be available for inspection on boat whenever boat is in operation. Possession of certificate made prima facie evidence that person whose name appears thereon is owner of boat referred to, in prosecutions under act. Owner must notify Comm'n of transfer of his interest (other than security interest) in a numbered boat within 15 days of transfer, and certificate holder must notify Comm'n of change of address within 15 days. Owners possessing valid commercial fishing license or boat permit for use of State-owned lakes issued by Dep't of Conservation and Development not required to pay fee for certificate; owner receiving certificate for more than three boats to pay only $1 fee for all boats after first three. Exempts from numbering requirements: (a) motorboats covered by numbers awarded pursuant to federal law or to federally approved numbering system of another state, for 90 consecutive days in NC; (b) motorboats from foreign countries temporarily using waters of State; (c) motorboats owned by U.S., a state or subdivision thereof; (d) ship's lifeboats; and (e) motorboats in classes exempted by Comm'n after finding that numbering thereof will not materially aid in identification and would be exempt from applicable federal numbering system. (2) Provides detailed requirements concerning motorboat equipment, varying according to classes of boats (Class A: less than 15' long; Class 1: 16-26' long; Class 2: 26-40' long; Class 3: 40' long or over), including efficient whistles, efficient bell (classes 2,3), life preserver devices, fire extinguishers, carburetors, Comm'n prescribed ventilation of engine and fuel tank, and effective muffling equipment. Motorboats competing in races exempted from some requirements. Comm'n authorized to modify equipment requirements to conform to Federal Navigation Laws or U.S. Coast Guard navigation rules. Prohibits operation or giving permission for operation of vessel not equipped as required; prohibits owner of boat livery from renting boat equipped with more than 10 hp. to any person unless provisions complied with; and makes it duty of all owners of boat liveries to equip all motorboats rented as required by act. (3) Prohibits: (a) operation of any motorboat or vessel (defined as every description of watercraft, other than seaplane on water, used or capable of use as means of water transportation), and manipulation of water skis, surfboard or similar device in reckless or negligent manner so as to endanger life, limb or property of any person, or while intoxicated or under influence of any narcotic drug, barbiturate or marijuana; (b) operation of any vessel on waters of State for towing person on water skis, surfboard or similar device unless a person in addition to operator is in vessel in position to observe progress of person being towed or unless skiers wear life preserver or unless boat is equipped with rear view mirror; (c) operation of vessel on waters of State towing person on water skis, surfboard or similar device, and engaging in water skiing, etc., between the hours from one hour after sunset to one hour before sunrise; and (d) operation of any vessel, tow rope or other device by which direction or location of water

skis, etc., may be affected or controlled in such way as to cause skis, etc., or person thereon to collide with any object or person. (4) Permits Comm'n to authorize and regulate regattas, boat races, exhibitions etc., and requires person in charge to file application to hold regatta, etc., with Comm'n at least 15 days prior thereto; these provisions do not exempt any person from compliance with applicable federal regulations, but no State permit required if permit has been obtained from authorized federal agency. (5) Permits any subdivision of State to apply to Comm'n for special regulations concerning safe and reasonable operation of vessels on waters within its territorial limits, and authorizes Comm'n to make such special regulations, but regulations governing operation of vessels on State-owned lakes shall be made exclusively by Dep't of C. & D. (6) Requires operator of vehicle involved in collision, accident or casualty to render practicable and necessary assistance to other persons affected, to identify self and vessel to any injured person and to owner of any property damaged, and if collision, etc., results in death or personal injury or property damage exceeding $100, to file accident report with Comm'n within 10 days. (7) Requires filing of copy of regulations adopted in office of Comm'n , Secretary of State, and CSC of counties in which boats are operated. (8) Authorizes all peace officers and wildlife protectors of State and subdivisions to enforce act, and in exercise thereof to stop vessels subject to act, and after identifying self to board and inspect vessels. Requires Comm'n to pay 15% of funds collected under numbering provisions quarterly to Commercial Fisheries Division, to be used for employing and equipping additional enforcing officers, and authorizes Comm'n to make similar arrangements with other State and local agencies. (9) Provides for creation within Comm'n of Motorboat Division to enforce and administer act, subject to Comm'n and Executive Director, and for designation by Comm'n of three of its members as Motorboat Committee to place special emphasis on administration of act and supervision of Motorboat Division (together with two citizens appointed by Governor from State at large to advise Committee). Expenses of Motorboat Division and of administering act to be paid from funds collected pursuant to numbering provisions, but Comm'n with approval of Advisory Budget Comm'n, Governor and Council of State may borrow maximum $100,000 to activate Division, to be repaid within two years. (10) Makes violations of item (3)(a) above misdemeanors, punishable by maximum $500 fine and/or 6 months' imprisonment, and violations of other provisions misdemeanors, punishable by maximum $50 fine.] To Wildlife Resources.

SB 331 - Introduced by Rose and others

"To amend G.S. 106-65 to regulate the sale of maleic hydrazide and to prohibit the use of maleic hydrazide on growing tobacco." [Adds G.S. 106-65-13 (G.S. 106-65.13 already exists) to declare maleic hydrazide and substances containing it to be "economic poisons". Makes it unlawful to: (1) apply maleic hydrazide to growing tobacco; (2) advertize maleic hydrazide as suitable for application to growing tobacco; (3) sell or deliver maleic hydrazide with knowledge or reason to believe it is to be used on growing tobacco; (4) sell, deliver, or buy maleic hydrazide except in original container with conspicuous label stating that it is unlawful to use it on growing tobacco (also unlawful to destroy or deface such label and possession of maleic hydrazide in container without such label is prima facie evidence of violation by possessor); (5) sell or deliver maleic hydrazide without keeping record showing name and address of person to whom sale or delivery was made, amount thereof, and the date (such record must be retained for year and be subject to inspection by Comm'r of Agriculture or his representative); and, (6) acquire maleic hydrazide without keeping record of person from whom acquired and date of acquisition (with same retention and inspection provisions). Makes possession of lesser quantity than records of acquisition minus records of sales or deliveries indicate should be possessed prima facie evidence of violation of act. Authorizes State Board of Agriculture to adopt regulations to carry out act, and makes violation of any of provisions of act misdemeanor punishable in discretion of court. On and after date specified in notice, assessments approved and in force to be deducted by purchaser (or his representative) from purchase price of cattle acquired for slaughter. Makes unlawful the

buying or selling of cattle for slaughter without deducting authorized assessments. Monthly assessments to be remitted by purchaser by 20th day of following month to Comm'r of Agriculture (who shall pay such assessments over to the agency entitled thereto). Records of auction markets, slaughterhouses, etc., to be open at all times during business hours for inspection by Comm'r or his agents. PUBLIC BILLS INTRODUCED -- SENATE

SB 335 - Introduced by Hancock and others
"To amend Chapter 58 of the General Statutes relating to public hearings on revision of insurance rates." [Rewrites GS 58-27.1 to create within Insurance Dep't an Insurance Commission (to replace present insurance advisory board) consisting of five (now seven) members. Insurance Comm'r to be member and chairman of Comm'n; remaining four members (two must have insurance business experience and two, designated as public interest appointees, must have at least 10 yrs. experience in business, professional or governmental activities) to be appointed by Governor and may be removed by him for cause. No person with direct or indirect interest in insurance company (except as insured or beneficiary of insurance or as receiver, liquidator or conservator for an insurer) may be public interest appointee. Initial appointees (terms to become effective Oct. 1, 1959) to serve terms of one, two, three, and four years respectively; thereafter successors all to be appointed for four years. Members to receive $25 (now $7) per diem and expenses. Comm'n shall promulgate regulations for holding of public hearings (pursuant to GS 58-27.2) and shall approve and act on proposals to revise existing rate schedule (effect of which is to increase or decrease insurance charge or set up new schedule) when Comm'n deems proposals require public hearing. (Now insurance advisory board merely provides by rule for conduct of such hearings, and Insurance Comm'r makes determinations on such proposals.) Rewrites GS 58-27.2 to conform with above changes; to provide that Comm'n shall hear matters presented to it at hearings and enter order(s) deemed just and proper by majority vote of membership; to provide that any order of Comm'n shall be subject to court review as orders of Comm'r pursuant to GS 58-9.3; and to extend application of section to companies making independent filings under GS Ch. 57 (as well as 58 and 97).
